

Archaeological Mitigation at Magna Park, Lutterworth, Leicestershire

June 2020 to March 2021

Stephen Morris

Archaeological Mitigation at Magna Park, Lutterworth, Leicestershire

June 2020 to March 2021

Stephen Morris

With contributions from

Rob Atkins, Ann Bojko, Paul Blinkhorn, Andy Chapman, Pat Chapman,
Chris Chinnock, Nicholas J Cooper, Nina Crummy, Marvin Demicoli,
Adam Reid and Wendy Smith

Illustrations by

Sofia Turk (plans, sections and small finds drawings),
Hugh Gatt (reconstruction drawings)
and Michael Hawkes (pottery drawings)

1: Introduction	1
Project background	1
Topography and geology along the route.....	1
Historical and archaeological background	1
Archaeological work in the area	10
Approach to the archaeological investigation	10
Summary and site phasing	13
Planning application and 106 agreement	14
2: The archaeological evidence	19
Period 1, Areas A13 and A15, middle Bronze Age funerary sites (1500-1000BC)	19
Period 2a, Areas A2, A15 and X25, middle-late Iron Age settlements	26
Period 2b, Areas A1, A10, A13 and A15, late Iron Age/early Roman transition (late 1st century BC- middle 1st century AD)	52
Periods 3a-3e, Areas A1, A2, A10, A13 and X25, Roman occupation (AD43-AD350+).....	63
Period 3a, Areas A1, A10, A13 and X25, early-middle Roman (AD43-AD150)	63
Period 3ai, Areas A2, A10 and A13 early Roman (early-middle 2nd century AD) (AD100-AD150).....	73
Periods 3b-3d, Area A1, A2, A10 and A13, middle-late Roman, (AD150-AD350).....	85
Period 3d, Areas A1 and A2, late Roman activity (AD250-350).....	98
Period 3e, Area A1, Roman quarrying activity (AD350+).....	101
Periods 4, 5 and 6, Areas A15, A18, X24, X25 Medieval to post-medieval (Early-middle Saxon to the late 17th-18th century)	105
Periods 4a-4aii, 5a-5e, Areas A15, A18, X24 and X25, Saxon and medieval activity.....	105
Period 5a, Areas A15, A18 and X25, medieval settlement activity (11th-12th century).....	108
Periods 5a, 5ai, 5aii and 5b, Area X25, 11th-12th century medieval settlement.....	115
Periods 5a-5b, Areas X25, 12th century medieval settlement	117
Period 5c, Areas A18 and X25, 12th-middle 13th century medieval activity	123
Period 5d, Areas A18 and X25, middle 13th-14th century medieval activity.....	125
Period 5e, Area A18, late 14th-middle 16th century activity.....	127
Period 6a, Area X24, post-medieval track	128
3: Finds	129
Worked Flint	129
by Ann Bojko	
Middle Bronze Age pottery cremation vessels	129
by Nicholas J Cooper	
Iron Age and Roman pottery	134
by Nicholas J. Cooper	
Saxon to post-medieval pottery	161
by Paul Blinkhorn	
Fired clay loomweights and oven plates	164
by Pat Chapman	
The slag.....	165
by Andy Chapman	
The stone.....	166
by Andy Chapman	
Ceramic building material and fired clay	166
by Rob Atkins	
Metal and non-metallic small finds	170
by Nina Crummy	

4: Human remains	178
Human bone	178
<i>by Chris Chinnock</i>	
5: The faunal and environmental evidence.....	188
The animal bone	188
<i>by Adam Reid</i>	
Charred plant remains	189
<i>by Wendy Smith</i>	
Wood-Charcoal Analysis	227
<i>by Marvin Demicoli</i>	
6: Discussion by Rob Atkins and Stephen Morris.....	245
Landscape characterisation	245
Early prehistoric activity.....	245
Middle Bronze Age burials	245
Late Bronze Age and early Iron Age.....	247
Roman occupation (AD43-middle 4th century)	253
Medieval and Post-medieval activity.....	259
Bibliography	264

List of Figures

1: Introduction

Figure 1.1 Site location and excavation areas	2
Figure 1.2 Heritage Assets: Historic Environment Record (HER) data	3
Figure 1.3 Topography and watercourses	4
Figure 1.4 Landscape survey of the deserted medieval village of Bittesby	7
Figure 1.5 Railway bridge, looking north-west	9
Figure 1.6 In the middle of the eastern side of Bittesby DMV with tree cover hiding the railway embankment, looking north.....	9
Figure 1.7 Bittesby House and outbuildings, looking west.....	10
Figure 1.8 Geophysical survey results.....	11
Figure 1.9 Excavation areas, geophysical survey, and previous archaeological works.....	12
Figure 1.10 Road signs to Magna Park North, looking north-east	15
Figure 1.11 New warehouse within the former A1 excavation area with Bittesby House and outbuildings in distance, looking north-west	15
Figure 1.12 New warehouses where excavation areas A15 and A13 had been located and a new pathway with recent tree planting, looking north-west	16
Figure 1.13 A balancing pond in the location of former X25 excavation area, looking south.....	16
Figure 1.14 New bridge over water feature, with warehouse built over excavation Area A15 in distance, looking south-west	17
Figure 1.15 Part of new park with bridge over water feature and former railway route defined by trees, looking north-east.....	17
Figure 1.16 Water feature, looking north.....	18

2: The archaeological evidence

Figure 2.1 Period 1, middle Bronze Age cremations, Areas A13	20
Figure 2.2 Section through cremation C3, [3014], (3013), capping fill (3012) looking west	21
Figure 2.3 Section through cremation C23, [3948], (3947), capping fill (3946) looking south-west.....	21
Figure 2.4 Section through burial C28, [3995], (3993/4), capping fill (3992) in cremation vessel.....	21
Figure 2.5 Plan view of burial C8 (3027) in cremation vessel (3028), looking north- west.....	21
Figure 2.6 The preparation for the block-lifting of cremation vessel (3950) containing burial C24 (3949), looking north-east.....	21
Figure 2.7 Excavation of burial C16 (3052) in cremation vessel (3053), looking north-east	23
Figure 2.8 Period 1, middle Bronze Age cremations Area A15.....	24
Figure 2.9 Cremation C1, with grey-white carbonised bone and fragmented pottery cremation vessel visible in the pit cut [4008], A15	25
Figure 2.10 Chart showing calibration of radiocarbon age to calendar years for selected cremations from Areas A13 and A15	27
Figure 2.11 Geophysical survey and evaluation trenching, Area A2.....	28
Figure 2.12 Period 2a: middle-late Iron Age settlement, 1st century BC, Area A2.....	29
Figure 2.13 Drone picture of Area A2, looking south.....	29
Figure 2.14 Section 1012, late Iron Age ditch and deeper Roman recut [1040] of boundary ditch BD12, including pit cut [1414] – photograph looking west. (1:25)	30
Figure 2.15 Enclosure 9, the south side entrance terminal [1251], looking south, and Section 1060 of ditch [1183] and recut [1180] at the north-east corner of the enclosure (1:20)	31
Figure 2.16 Section 1079 of ditch [1234] (1:20)	31
Figure 2.17 Ring ditch cut [1029] and pit [1415] (background) of roundhouse RD2.....	32

Figure 2.18 Section 1010 of ring ditch cut [1029], pit [1415] and earlier ring ditch [1031], and Section 1011 of ring ditch cut [1029] of roundhouse RD2 (1:10)	33
Figure 2.19 Roundhouse RD5: Section 1057 of ring ditch [1175] on the west side of roundhouse, and Section 1065 of ring ditch [1204], close to the south side of the entrance of roundhouse.....	33
Figure 2.20 Pottery vessel in ditch [1204] found close to the south side of the entrance of roundhouse RD5, and fully excavated ring ditch [1204] RD5, showing pottery vessel at the base, looking west	34
Figure 2.21 Excavated quadrant of quarry pit/watering hole [1124], facing north-east	35
Figure 2.22 Section through quarry pit/watering hole [1124], with later Roman pit cut [1200] (left side), facing north.....	36
Figure 2.23 Drone picture of Area 15 bounded by the A5 road, looking south	37
Figure 2.24 Geophysical survey and evaluation trenching, Area A15.....	38
Figure 2.25 Periods 2ai-2aai: middle-late Iron Age settlement, Area A15.....	39
Figure 2.26 Ring ditch [5437] D18, looking south.....	40
Figure 2.27 Enclosure ditch [4237], E20 (left side) with posthole [4235] and recut enclosure ditch [4240], E21 (right side), looking west, and Section 4082 of enclosure ditches of E20 and E21 (1:25)	41
Figure 2.28 Ring ditch RD9 close to the south entrance terminal, cut [4362] (right) and recut [4360] (left), looking north-east.....	41
Figure 2.29 Cut of ring ditch [4535] on the north side of roundhouse RD9, looking east.....	42
Figure 2.30 Ring ditch RD9, north entrance terminus [4300] (left) cut by pit [4360] (centre), with later ring ditch RD10 cutting east-west, looking west	42
Figure 2.31 Stone filled pit [4707], looking north, and Section 4137 of [4407] (1:20)	43
Figure 2.32 South-east corner of boundary ditch BD15, looking south-west, and Section 4002 of the south ditch of boundary BD15	43
Figure 2.33 Posthole [4071], displaying possible in situ burning, looking north-west	44
Figure 2.34 Ditch [4483] of boundary BD16, looking south	44
Figure 2.35 North arm ditch [4138] of boundary BD17, looking north-east	44
Figure 2.36 Ditch terminal [4252], looking south-east, and Section 4085 of [4252] (1:10).....	46
Figure 2.37 Pit [4068], found close to roundhouse RD13 containing Iron Age pottery and burnt material, looking south-east.....	48
Figure 2.38 Section 4008 of pit [4068], containing Iron Age pottery and burnt material (1:20).....	48
Figure 2.39 Period 2aiv: middle-late Iron Age settlements, Area A15 (1:1500)	49
Figure 2.40 Ditch [4273] on the west side of enclosure E21, looking north-west.....	49
Figure 2.41 Terminus [4387] on the south side of roundhouse RD10, looking south-east	50
Figure 2.42 Enclosure E22: south terminus ditch [4558], looking south, and Section 4003, south-west corner ditch [4021] (1:20)	51
Figure 2.43 Enclosure E22: top - north-west corner, ditches [4021] (left) and [4375] (right), looking east, centre - north-west corner, ditch [4375], looking south, and Section 4125, ditch [4993], north-west corner of enclosure E22 (1:25).....	51
Figure 2.44 Geophysical survey and evaluation trenching, Area A1 (1:1500).....	53
Figure 2.45 Period 2b: late Iron Age, Area A1 (1:1000)	54
Figure 2.46 Section 87 of boundary ditch BD11 (1:25).....	54
Figure 2.47 Section 85 of boundary ditch BD10 (1:25).....	55
Figure 2.48 Geophysical survey and evaluation trenching, Area A10 (1:1500).....	56
Figure 2.49 Period 2b, late Iron Age, Area A10 (1:1000)	57
Figure 2.50 Eastern terminus of enclosure E8, truncated by furrow, looking east.....	57
Figure 2.51 Geophysical survey and evaluation trenching, Area A13 (1:2000).....	58
Figure 2.52 Period 2b: late Iron Age-early Roman transition, Area A13 (1:1250).....	59
Figure 2.53 Drone photo of Area A13, heavily scarred by furrows and land drains, looking west	60
Figure 2.54 Ditch [3210] on the west side of enclosure E1, looking north-west.....	60

Figure 2.55 Pit [3698], looking south-east	61
Figure 2.56 Period 2b, late Iron Age-early Roman transition and post-medieval pit, Area A15 (1:1750).....	62
Figure 2.57 Section 4059 of ring ditch [4173], and posthole/pit [4176], RD12.....	62
Figure 2.58 Area A1, looking north-west along Roman Watling Street (A5)	64
Figure 2.59 Period 3a early Roman settlement, Area A1 (1:1000).....	65
Figure 2.60 Period 3a, early Roman enclosures, Area A10 (1:1000)	67
Figure 2.61 Ditch [2043] on the west side of enclosure E13, facing north.....	68
Figure 2.62 A possible watering hole or quarry pit WH1, looking south-west, and Section 2011 (1:50).....	69
Figure 2.63 Period 3a, early Roman settlement, Area A13 (1:1250).....	70
Figure 2.64 Broad west side enclosure ditch [3461], looking north-west, and Section 3155 (1:20).....	71
Figure 2.65 Trackside ditch cut [3274] of D2 on the north side of trackway T2, containing the human remains of burial B2, looking north.....	72
Figure 2.66 Period 3ai, early-middle 2nd century Roman settlement, Area A2 (1:1500)	74
Figure 2.67 Boundary ditch BD20, cut by a post-medieval land drain, looking north	75
Figure 2.68 Section 1124 of waterhole [1403] (1:50)	76
Figure 2.69 Period 3ai, early Roman enclosure, Area A10 (1:1000)	77
Figure 2.70 South-east corner [2037] of sub-square enclosure E29, looking south	77
Figure 2.71 Stone filled pit [2294], looking north	78
Figure 2.72 Periods 3ai and 3aai, early Roman settlement, Area A13.....	79
Figure 2.73 Section 3323 of boundary ditch BD13, looking west	79
Figure 2.74 Pit [7070], facing north.....	80
Figure 2.75 Pit [3493], facing east	81
Figure 2.76 Ditch [3892] at the north-west corner of enclosure E18, cutting earlier E2 enclosure ditch [3895], facing east	82
Figure 2.77 Section of the multiple cuts, flanked by pits on the west side of enclosure E19, looking north	82
Figure 2.78 South side posthole [3333] of four-post structure S7, with stone packing, facing south	83
Figure 2.79 Period 3b, middle-late Roman settlement, Area A2 (1:1500).....	85
Figure 2.80 Pit [1200] (dark fill), cut into larger pit [1124], looking north	86
Figure 2.81 Period 3b, middle to late 2nd century Roman enclosure group, Area A10 (1:1000)	88
Figure 2.82 West side ditch of enclosure E32 (left), cut by enclosure E34, looking north	89
Figure 2.83 Well/watering hole WH2, looking north-west, and Section 2089 (1:20).....	89
Figure 2.84 Period 3bi, late 2nd century Roman settlement, Area A10 (1:1000)	90
Figure 2.85 Machine excavated watering hole WH3, looking north.....	92
Figure 2.86 Period 3c, middle Roman settlement, Area A1 (1:1000)	93
Figure 2.87 South side ditch of enclosure E27, looking east.....	94
Figure 2.88 East side ditch of enclosure E27, looking north-east	94
Figure 2.89 Boundary ditch BD19, containing pottery vessels, looking south.....	94
Figure 2.90 Boundary ditch BD19, fully excavated, looking north, and Section 2 (1:20)	94
Figure 2.91 Roman pottery and animal bone in boundary ditch BD19, looking west.....	95
Figure 2.92 Partially excavated grey ware bowl (SF3) in boundary ditch BD19, looking west	95
Figure 2.93 Period 3c, middle-late Roman settlement, Area A13 (1:1500)	96
Figure 2.94 West side ditch of the enclosure E30, looking north.....	97
Figure 2.95 Period 3d, middle-late Roman settlement, Area A1 (1:1000).....	99
Figure 2.96 The north side gully to track T3, looking north	101
Figure 2.97 Period 3e, Roman quarrying, Area A1 (1:1000)	102
Figure 2.98 Plan of intercutting pits on the western edge of the quarry area, looking south-west.....	103
Figure 2.99 Section of intercutting pits on the eastern edge of the quarry area, looking south-west	103

Figure 2.100 Samian Ware pottery depicting nude man.....	104
Figure 2.101 Roman ‘Kapitan’ amphora rim from Area A1.....	104
Figure 2.102 Coin SF19, Trajan Danube victory issue CAD107. The obverse side (left) shows a laureate bust of Trajan. On the reverse (right) is a depiction of a personification of the Danube	104
Figure 2.103 Coin SF40. The obverse side (left) shows a laureate bust of Sabina, wife of Hadrian. On the reverse (right) is the personification of Venus, holding a spear and helmet	104
Figure 2.104 Plan of coins and other metal finds in the area of quarrying, Area A1 (1:1000)	105
Figure 2.105 Drone picture of the DMV of Bittesby, earthworks of the settlement are in the pasture field to the right. The tree covered embankment of the former railway masks much of the settlement. Areas A18 and X25 can be seen in the respective top left and bottom right corners, looking north-east	106
Figure 2.106 Tebby’s interpretation of the 1842 map with field boundaries and names in the development area (1:17500).....	107
Figure 2.107 Geophysical survey and evaluation trenching, Area X25 (1:1000).....	109
Figure 2.108 Periods 4a-5a, early-middle Saxon and 11th-12th century settlements, Area X25 (1:1000)	110
Figure 2.109 Geophysical survey and evaluation trenching, Area A18 (1:1500).....	111
Figure 2.110 Archaeological investigations, Area A18 (1:1000).....	112
Figure 2.111 Period 5a, 11th-12th century medieval settlement, Area A18 (1:500).....	113
Figure 2.112 The southern terminus [5148] of ditch D40, looking north-west	114
Figure 2.113 The near-complete base of a 12th century Potters Marston Ware jar in the upper fill of boundary BD24, east side ditch, looking south-east	114
Figure 2.114 Ditch D39 and adjacent shallow pit, looking north-west	114
Figure 2.115 Drone picture of Area X25 (foreground) and the Bittesby DMV earthworks are in the pasture field beyond. Area A18 is in the top right corner, looking north-east.....	116
Figure 2.116 Section 6128 of ditch D45 and enclosure ditch of E40 (Periods 5a-5b) (1:20).....	116
Figure 2.117 Period 5ai, 12th century medieval settlement, Area X25 (1:1000).....	117
Figure 2.118 Section 6101 of enclosure E38 (1:20).....	118
Figure 2.119 Section 6004 of ditch at the corner of enclosure E38 and pit [6027] (1:20)	118
Figure 2.120 Section 6064 of ditches D57 (left), BD26 (right) and BD27 (centre) (1:20).....	119
Figure 2.121 Period 5aai, 12th century medieval settlement, Area X25 (1:1000).....	120
Figure 2.122 Period 5b, 12th century medieval settlement, Area X25 (1:1000).....	121
Figure 2.123 Periods 5c, 5d and 5e, 12th-16th century settlements, Area A18 (1:500).....	122
Figure 2.124 Late 12th-14th century boundary BD25, comprising a succession of three ditches, looking north-west, and Section 5006, comprising a succession of three ditches (1:25)	123
Figure 2.125 Clay lined pit, kiln/oven [5177], looking south-west, and Plan and Section 5053 of [5177] (scale 1:20)	124
Figure 2.126 Pit [5065] and recut pit [5068], looking south-west	126
Figure 2.127 Periods 5c and 5d, Late 12th-14th century activity, Area X25 (1:1000).....	126

Figure 5.13 Middle-late Roman spelt (<i>Triticum spelta</i> L.) glume bases from sample 1 (context 10/ cut 12/ Boundary Ditch BD19/ Area 1)	204
Figure 5.14 Relative proportion of plant categories in medieval samples from Lutterworth Magna Park.....	205
Figure 5.15 Poorly preserved indeterminate wheat (<i>Triticum</i> spp.) grain from medieval Period 5c (12th – 13th centuries AD) sample 5005 (context 5175/ oven/ kiln feature [5177]/ Area 18)	214
Figure 5.16 Distribution of tubers in Area 13 Cremations	217
Figure 5.17 Middle-late Roman spelt (<i>Triticum spelta</i> L.) grain still encased in remnants of the spikelet from sample 1 (context 10/ cut 12/ Boundary Ditch BD19/ Area 1)	220
Figure 5.18 Poorly preserved, middle-late Roman, indeterminate wheat spikelet forks from sample 1 (context 10/ cut 12/ Boundary Ditch BD19/ Area 1).....	220
Figure 5.19 Charcoal diagram showing the percentage per taxon composition of the individual contexts from Magna Park. The samples are arranged chronologically by period and C14 probability curves accompany directly dated cremation contexts. Periods: 1 - middle Bronze Age (1500- 1300BC); 3a – early Roman (~AD50-150); 3b – mid Roman (AD150-250); 3b-3d late Roman (AD250-350)	229
Figure 5.20 Relative percentages of ring curvature degree (CD) classes of: (left) all taxa in the individual analysed contexts, contexts to the right of the dashed vertical line are dated to the middle Bronze Age; and (right) all taxa arranged by taxonomic identification. CD 1: low ring-curvature, CD 2: medium ring curvature, CD 3: high ring curvature.....	230
Figure 5.21 Relative percentages of ring curvature degree (CD) classes of: (left) <i>Quercus</i> (oak) fragments in middle Bronze Age contexts; and (right) <i>Alnus</i> (alder, including <i>Corylus/Alnus</i>) fragments within middle Bronze Age contexts. CD 1: low ring-curvature, CD 2: medium ring curvature, CD 3: high ring curvature	231
Figure 5.22 Distribution of pre-combustion degradation features on charcoal: (left) from the different middle Bronze Age contexts; and (right) from the identified middle Bronze Age taxa.....	232
Figure 5.23 Distribution within middle Bronze Age contexts of pre-combustion degradation features on charcoal of: (left) <i>Quercus</i> (oak); and (right) <i>Alnus</i> (alder, including <i>Corylus/Alnus</i>)	233
Figure 5.24 Distribution within middle Bronze Age contexts of radial cracks within: (left) all the identified charcoal; (top right) <i>Quercus</i> (oak) charcoal; and (bottom right) <i>Alnus</i> (alder, including <i>Corylus/Alnus</i>) charcoal.....	236
Figure 5.25 Distribution and degree of vitrification within middle Bronze Age contexts: (left) all the identified charcoal; (top right) <i>Quercus</i> (oak) charcoal; and (bottom right) <i>Alnus</i> (alder, including <i>Corylus/Alnus</i>) charcoal.....	237
Figure 5.26 Plan showing location of cremation burials in Area 13, with pie charts showing the percentage taxonomic composition within the analysed cremation contexts	238
Figure 5.27 Correspondence analysis (CA) biplots for per fragment dendro-eco-anthracological feature frequencies from all analysed middle Bronze Age contexts and all identified middle Bronze Age taxa. Triangles represent dendro-eco-anthracological features while circles represent individual charcoal fragments. (Left) CA on dimensions 1 and 2 and (right) CA on dimensions 1 and 3.....	239
Figure 5.28 Correspondence analysis (CA) biplots for per fragment dendro-eco-anthracological feature frequencies from analysed middle Bronze Age contexts having (left) majority <i>Quercus</i> fragments and (right) majority <i>Alnus</i> (including, <i>Corylus/Alnus</i>) fragments. Triangles represent dendro- eco-anthracological features while circles represent individual charcoal fragments	240

Acknowledgements

MOLA (Museum of London Archaeology) gratefully acknowledges the generous support of RPS Heritage on behalf of our clients (GLP). Peter Baird and Gwyn Stubbings of GLP are especially thanked for their help, including their support. Simon Mortimer of RPS ensured the smooth running of the project and greatly helped in the success of the project including insightful comments to the various reports submitted. Dr Susan Tebby's immense historical work in the area was useful for the understanding of the archaeological remains found. Steve Critchley kindly metal detected the site and found most of the metal artefacts including the majority of the coins from the possible Roman coin hoard. Steve's work greatly increased the information gained from the site.

Riva Boutylkova, Bryony Cairncross and Louise Fowler are thanked for their work on the display of site artefacts and cases for Lutterworth Museum. The support for the project shown by Geraldine Robinson, Chairman of Lutterworth Town Estates Charity is greatly appreciated, as are the contributions of Richard Nunn from Lutterworth and District Museum. Helen Sharp and Caroline Lockwood, of Leicestershire County Council Museum Service, were very encouraging throughout and kindly lent the artefacts to Lutterworth and District Museum. Rob Atkins, Stephen Morris and Andy Sherman provided information on the archaeological boards to be displayed at Magna Park North. Harvey Walton, Project Director of Landmark, is thanked for his constructive role in preparing the boards on behalf of the client. Richard Clark, Leicestershire County Council Principal Archaeologist (LCC PA), monitored the work on behalf of the local Authority. The project was managed for MOLA by Rob Atkins and Anthony Maull. The publication report has been prepared by Stephen Morris with editorial comment by Rob Atkins. Proof reading was carried out by Rob Atkins, Bryony Cairncross, Christopher Chinnock and Tracy Preece.

Finally, as always, MOLA are indebted to the many staff who undertook the site fieldwork. The different excavation areas were directed by Jim Burke, Gemma Hewitt, James Fairclough, Simon Markus, Graham Arkley, Levente Balazs, Sara Farey, Ryszard Molenda, Roman Kałuziński, Kamil Orzechowski, Chris Penell, Alex Shipley, Paul Sharrock, Victor Ballesteros, Lucie Collett, Mauro Carinci, Agnieszka Drobiazgowicz, Lewis Ernest, Simona Falanga, Joan Dols Ferrandis, Daena Guest, Patricia Jager, Martin Mawby, Laura Mitchell, Valeria Monno, Jeremy Mordue, Jeff Morris, Giuseppe Nanna, Jon Ortiz, Joseph Pacheco, Rob Pearce, Erik Moreno Perez, Sandra Garcia Perez, Eleanor Phillips, Luigi Piroso, Mathilde Ribordy, Magdalena Rybska, Casimir Radva, Victor Ramirez, Anna Rojek, Paige Savage, Phoebe Scrivener, Letisha Service, William Tamblyn, Ioanna Vassi, Simon Williams and Harry Young. Thanks to all the specialists and illustrators who were involved. The Finds and Environmental Processing team especially Jennifer McNulty are thanked for their work in cleaning, marking and organising the finds for examination by specialists. The work of the MOLA archivists is appreciated, especially Ffion Rogers, for preparing the material for the archives.
